South Tangerang

Informatics Engineering student at UIN Syarif Hidayatullah Jakarta with hands-on experience in IT support and frontend web development. Adept at technical troubleshooting, managing OS and network issues, and delivering responsive, user-centric web applications using React.js. Combines a strong foundation in IT infrastructure with administrative diligence, aiming to leverage problem-solving skills to contribute effectively as an IT Service Desk & Admin intern.

## Education Level

Universitas Islam Negeri Syarif Hidayatullah Jakarta - Jakarta, Indonesia Aug 2022 - Present

Undergraduate Informatics Engineering, 3.56/4.00

- Relevant Coursework: UI/UX Design, Multimedia Systems, Data Analysis, Human-Computer Interaction

## Work Experiences

PT PLN NP UP Muara Tawar - Bekasi, Indonesia Aug 2025 – Nov 2025

### IT Support Intern

A key power generation unit under PT PLN Nusantara Power, responsible for managing large-scale power plant operations. Supports critical infrastructure with advanced technical systems, ensuring reliable electricity supply through efficient IT maintenance and operational support.

- Provided Level 1 IT Support for 50+ employees daily, efficiently resolving 100+ technical incidents throughout the internship, including OS (Windows) installation, software configuration, and user account/access management.
- Managed IT infrastructure deployment for 20+ new workstations, including network cabling (crimping), and network switch configuration to ensure 100% operational readiness for users.
- Maintained network stability across 3+ office buildings, performing systematic network diagnostics and hardware troubleshooting that effectively minimized system downtime by approximately 20%.
- Contributed significantly to the full-cycle development of an internal Procurement Website using Laravel, which improved data accessibility and reporting efficiency for 100+ internal users.
- Maintained 100% accuracy in administrative documentation for IT inventory and incident reports, ensuring all hardware/software issues were logged for future maintenance and auditing.

## Projects and Organisational Experience

GDGOC UIN Syarif Hidayatullah Jakarta Oct 2024 – Jul 2025

### Event Staff

A university-based community for developers interested in Google technologies. We provide a platform for students from all academic backgrounds to learn, collaborate, and grow through workshops, weekly classes, and project-building activities, bridging the gap between theoretical knowledge and practical application.

- Contributed to the chapter's achievement as the #1 Most Active Chapter and #1 Most Impactful Chapter in Indonesia, supporting over 500+ members and partners with 55+ total events.
- Achieved excellence in event delivery, maintaining a 9.5/10 satisfaction rate for general sessions and a 93% session retention rate for technical workshops.

Class Manager — Weekly Class AI/ML Beginner Mar – Apr 2025

- Managed weekly sessions for 100+ active participants, coordinating mentors, scheduling, and class operations to ensure a highly interactive and effective learning experience.

Organizing Committee — Company Visit to DKatalis (Bank Jago) Jun 2025

- Coordinated a large-scale inter-campus company visit for 50+ participants from prestigious universities including UI, UPN Veteran Jakarta, UNJ, and Binus.
- Successfully managed end-to-end operations, including participant registration, digital publication, and external communications to ensure seamless collaboration between students and industry professionals.

## Skills, Achievement, & Other Experience
